PROFESSIONAL PROFILE

Ambitious IT specialist completing technical education, with solid foundations in network engineering (CCNA level) and Linux administration. I stand out for my hands-on approach to learning — independently designing complex network topologies (HA, BGP multihoming, VoIP) and building security automation scripts. Seeking an internship or Junior position where I can grow as a System Administrator or Network Engineer.

WORK EXPERIENCE

IT Support Specialist — Internship · Kompland s.c. | *Sandomierz, Poland* | *May 2025*
160-hour EU co-financed internship · Performance rating: 5/6 (Very good)

- Provided L1 technical support — hardware diagnostics & Windows troubleshooting
- Assembled desktop PCs, replaced components, and performed HDD/SSD data recovery
- Installed Windows OS, configured peripheral devices (printers, MFPs) in office environment
- Collaborated with service team to streamline daily repair workflows

IT Technician — Trainee · PGKiM Sp. z o.o. | *Sandomierz, Poland* | *Oct 2023*
140-hour technical trainee in large municipal organisation

- Assisted IT department in maintaining infrastructure for corporate users
- Prepared workstations: OS installation, domain configuration, hardware setup

KEY TECHNICAL PROJECTS

Enterprise HA Network — HSRP, BGP, VPN, WLC — *Cisco Packet Tracer* | *Dec 2025 – Jan 2026*

- Designed highly available campus network for HQ + Branch (HSRP gateway redundancy, zero-downtime failover)
- Configured eBGP Multihoming with two ISPs (AS 65001) — automatic rerouting on link failure verified via Traceroute
- Implemented Site-to-Site IPsec VPN (AES/3DES) for secure inter-office WAN connectivity
- Deployed WLC 2504 with centralised AP management, RADIUS/AAA 802.1x authentication
- Applied OSPF multi-area, IPv4/IPv6 Dual Stack, Zone-Based ACLs, Port Security with sticky MACs

Stack: *Cisco IOS, BGP, OSPF, HSRP, IPsec VPN, WLC, RADIUS, IPv6, ACL*

Enterprise VoIP — Cisco CME, Voice VLANs, IPsec — *Cisco Packet Tracer* | *Dec 2025 – Jan 2026*

- Configured Cisco 2911 as PBX (Telephony Service) with MAC address phone security
- Implemented Voice VLANs (VLAN 100) to segregate voice traffic and prepare QoS policies
- Set up DHCP Option 150 for centralised IP phone provisioning across the network
- Established IPsec Site-to-Site VPN (AES/3DES) to encrypt both voice and data traffic

Stack: *Cisco CME, VoIP, Voice VLANs, DHCP, IPsec VPN, ACL*

Linux Security Automation Suite — *Bash + API* | *2025*

- Authored scripts configuring UFW firewall (custom ports, logging) and Fail2ban SSH protection
- Integrated Telegram Bot API for real-time alerts on blocked IPs and daily ban summaries
- Automated HTML status page generation and log reporting via Cron (10-min + daily cycles)

Stack: *Bash, UFW, Fail2ban, Telegram API, Cron, Security Hardening*
